Professional Summary

Computer Science student with a strong focus on engineering principles and system scalability. Highly adaptable to new technologies, viewing languages and frameworks as interchangeable tools to solve complex problems. Demonstrated success in building data-intensive applications, with a commitment to continuous learning and writing clean, maintainable code regardless of the stack.

Education

FAST National University of Computer and Emerging Sciences (NUCES)

Karachi, Sindh

Bachelor of Science in Computer Science

Expected Graduation: June 2026

Technical Skills

- **Languages:** C/C++, JavaScript, Python, Dart, Java
- **Frameworks & Libraries:** Node.js, Express.js, Flutter, LeafletJS, BcryptJS, JWT
- **Databases:** PostgreSQL (PostGIS), MySQL, Supabase
- **Frontend:** HTML5, CSS3, Bootstrap, Handlebars (HBS), EJS
- **Cloud & Deployment:** Vercel, AWS (VPC, EC2, Load Balancer, Auto Scaling)
- **Developer Tools:** Git/GitHub, Postman, VS Code

Projects

OrbitalEye – Field Force Intelligence Dashboard

Sep 2025 – Present

Tech Stack: React.js, Supabase (PostgreSQL + PostGIS), Leaflet, OpenStreetMap

- Built a React.js command dashboard that empowered supervisors to monitor field operations and view staff availability in real time.
- Implemented Leaflet.js to deliver a low-cost geolocation map that visualizes staff positions and geofence boundaries.
- Designed the Supabase backend, using PostgreSQL with PostGIS extensions to process complex geospatial queries and support real-time updates.
- Designed a scalable database schema to support dynamic geofencing and role-based access control (RBAC) for secure field force management.

Downy Shoes (E-Commerce Website)

Mar 2025 – May 2025

Technology Stack: NodeJS, ExpressJS, MySQL, BcryptJS, JsonWebToken, Handlebars, CSS

- Designed a scalable e-commerce backend managing 100+ SKUs with real-time inventory sync via RESTful APIs.
- Developed an admin dashboard for inventory control, product updates, and sales analytics.
- Implemented JWT and BcryptJS authentication (10 salt rounds), cutting credential-related risks by 80%.

HealthGrid Pro

Oct 2024 – Dec 2024

Technology Stack: NodeJS, ExpressJS, MySQL, Handlebars, Bootstrap, CSS

- Optimized database schemas and API workflows to reduce average transaction latency by 40%, enabling seamless patient check-in and record retrieval.
- Built a secure multi-role access framework for admins, doctors, and patients, complete with dashboards and live metrics.
- Refined patient and doctor modules to enable CRUD operations, appointment scheduling, and tailored data categorization.

Certifications

- Developing Back-End Apps with Node.js and Express (Coursera)
- Introduction to HTML, CSS & JavaScript (Coursera)
- Introduction to Git and GitHub (Coursera)
- Problem Solving (HackerRank)
